# GARDEN SHEDS

STYLISH, HIGH QUALITY STORAGE SHEDS THAT ARE SIMPLE TO BUILD

## STYLISH STORAGE SHEDS

Crisp, clean and uncluttered lines are a feature of this attractive and economical shed. The Stratco Garden Shed is a simple, well designed storage unit that comes in a size to suit every lifestyle and backyard requirement. An uncluttered interior structure, combined with bold attractive lines on the outside, make Stratco Garden Sheds more than just a practical addition to the garden.

They are available in an impressive range of colours or in un-painted zinc/al. Quality construction means your Garden Shed will be a lasting investment. All parts and accessories are galvanised for durability. A sturdy ridge beam adds to the sheds rigidity. The walls are made from strong high profile steel sheeting, and the roof is made from the easy to maintain longrun roof.

## EASY TO BUILD

Designed for quick and simple construction, Stratco Garden Sheds are the ideal do-it-yourself project. The wall sections come as complete panels and the corners simply rivet together. Full length roof sheets mean there are no joins required on the ridge.

Alternatively Stratco can arrange to have your Garden Shed installed by a qualified trades person.

## OPTIONAL EXTRAS

Stratco Garden Sheds are available with a range of optional extras such as louvred windows, a skylight sheet, double doors, shed shelving and masonry anchors.
